

Make the World Your Studio

Cintiq Companion Hybrid is your creative companion

The creative world keeps changing – and Wacom keeps improving it. The new Cintiq Companion Hybrid combines the creative power of a full-featured 13" Cintiq Creative Display and an Android™ tablet.

Create wherever you want – on the go or on your desk

Cintiq Companion Hybrid is both a Cintiq and a mobile Android™ tablet, giving you the freedom to plug it into your computer in your studio to work with traditional creative software such as Adobe Photoshop® – or to work wherever you want, using creative Android™ applications. Your Android files transfer easily to your PC or Mac using the included ASTRO File Manager™. Cintiq Companion Hybrid features a full HD 13.3" wide screen, and the Wacom Pro Pen performs with 2048 pressure levels like a traditional brush or marker for an intuitive, natural creative experience. It has customizable on-screen controls, four customizable ExpressKeys™, the Rocker Ring, and a Radial Menu that provide one-touch access to your time-saving shortcuts.

Built for being creative, mobile and connected

While you're mobile, you'll never be out of touch, because Cintiq Companion Hybrid comes complete with everything you'd expect from a tablet, giving you complete access to e-mail and social media – wherever you are.

Powerful Cintiq performance and mobile creative Android™ power on top

Use Cintiq Companion Hybrid in your studio as a fully-fledged professional Cintiq Creative Display. Or go out and create wherever you want with your favorite Android™ apps including Wacom Creative Canvas and Manga Canvas.

Professional Hybrid Creative Tablet
